

# The Planets

Planet	Position in Relation to Sun	Type of surface	Type of atmosphere	Diameter	Time to Orbit	Time to Rotate	Features
Mercury	1 closest to Sun	rough and cratered	only helium gas	4 880km	88 days	59 days	*second smallest planet
Venus							
Earth							
Mars	4th from sun						*2 moons *below freeezing
Jupiter							
Saturn							
Uranus							
Neptune							*8 moons
Pluto	9 furtherest
