

# Teeth Game

This game requires:

\*Question cards

-these can be used on their own without the chance cards and track

\*Chance cards

\*Track - Enlarge this board and colour in the chance and question squares to match the cards

\*Dice

\*Counters

Preparation:

Children will need knowledge of the 'teeth' keywords.

Use a track with some question and some chance squares to play this game.

Alternately, the question cards on their own can be used to make their own track.

Children take it in turns to roll dice and move.

If question cards are used on their own as the track, then there is no particular end.

Children just roll the dice and progress around the board.

The following pictures may be cut out and attached to card to be used as counters.
